SOFTWARE PRESENTATION

IDEAL DISPATCH provides remote installing and uninstalling of software, remote running of
scripts and programs, and remote actions (view, copy, rename).

With the help of **IDEAL DISPATCH**, you can remotely install Windows patches, run scripts
and msi files, uninstall programs, or update software on all the servers and client workstations
on your network.

BENEFITS

IDEAL DISPATCH is quickly installed on any Windows stations or servers and can deploy
MSI packages, Windows scripts, batch files or uninstall software. Its intuitive interface, as
well as the management provided when adding a distribution server and creating a new
distribution, make **IDEAL DISPATCH** a very easy-to-use tool.

LICENSING

Our licensing is per administrator using the product, no matter how many servers and stations
you have to manage! This guarantees the best price (Starts at **329 Euros**).

CERTIFICATION

IDEAL DISPATCH has obtained the **Windows Certification**. The "Compatible - Windows Logo" means
our products passed Microsoft's compatibility tests for 64-bit and 32-bit. To earn the "Compatible
with" logo, software and hardware must pass Microsoft designed installation, performance,
reliability, and security tests so you can be sure these products are compatible with Windows.

IDEAL DISPATCH
DEPLOYMENT AND UNINSTALLING OF WINDOWS SOFTWARE

GENERAL DESCRIPTION OF THE SOFTWARE

IDEAL DISPATCH offers you a wide range of usage possibilities, thanks to the various types of actions it offers:

- ➢ **Script**: Makes it possible to run a local or remote script file (.bat, .cmd, VB Script, .msi, .exe, .com, etc.).
